

This general vending machine can be ambient, refrigerated or even frozen and is fully customisable making it the perfect option for your vending needs.

The machine is operated by a lift mechanism which safely collects the products from their selection bay and brings them down to the dispensing door at the bottom. In addition, you can add some ambient lockers to the side, and they can be controlled by the same contactless and ordering system.

Depending on the configuration, you could have 100's of products. It can store 160 1ltr glass bottles

8-12 weeks from point of order

Machine should be wiped clean weekly, or if any product is spilt or damaged as soon as that occurs.

13 amp

Coin acceptor, coin mechanism & contactless card reader including Phone payment feature

Dfresh Dfrozen

Features

- Elevator to collect fragile products and avoid breakages
- Photocells sensors in the tray to recognize the product dispensed
- Between 5 and 7 product trays to suit the height of the products
- From 3 to 12 product lines can be loaded on each tray
- A refrigerated area with high density insulation 50 mm, from 1°C to 4°C with GSM alarm (not included) and will block up if temperature rises above 4.1°C
- Shelves with either pushers or spirals chosen to suit the kind of product to be sold.
- A choice of payment systems - coin changer, banknote reader or contactless or a combination of the three

Doory 7 Doory 10

This ambient locker system can come with 7 or 10 doors and features:

- Black powder coated metal structure
- Doors with plexiglass windows to allow products inside to be seen
- Lockers connected to the master column or to a D-Fresh/D-Frozen to control the unit
- Led backlights to see the product inside the compartments.
